

# FRAGRANT PLANTS

Scents evoke memories from places and people in our past. Some scents smell clean and fresh while others are rich and spicy. Fragrant plants should be planted where you can appreciate and enjoy the fragrance – seating areas, along paths, or by doorway or window. Fragrance can be enjoyed in your garden throughout the year by creating seasonally changing sequences of scents.

## Trees

<u>Latin Name</u>	<u>Common Name</u>
<i>Albizia julibrissin</i>	Silktree
