\*Actual bloom time may vary a bit from place to place and year to year so the relative bloom times are given. In this area, the following bloom times are approximate.

Early = March/April

Mid = April /May

Late = May/June

\*Notes-The numbers 1, 2, and 3 refer to the pruning method. See our pruning sign for more details.

sh - This means this variety is tolerant of half shade to full sun

con-This means this variety can be grown in a container. You may need to repot it as it gets larger
