

# NW Native Plants

The abundance and notably varied plant life is unique to the Pacific Northwest. It is only natural as gardeners that we would want to incorporate these wonders into our own gardens. Why native plants? Natives are adapted to our climate and soils, they promote

Beneficial pollinating insects, they provide food and nesting materials for birds and animals. When planting to add native plants to the garden please consider your local conditions of micro-climate, soil, and vegetation to accommodate these temper-mental plants to they can flourish in the garden setting.
